

Tire Technology Expo 2026 Special Preview

January/February 2026 issue

European Rubber Journal is now preparing special preview coverage of the upcoming Tire Technology Expo in Hannover, Germany - March 3-5, 2026.

Coverage will run every day on the ERJ website and in the ERJ Daily Newsletter – in the weeks before and throughout the fair.

The preview, therefore, offers a dedicated platform for Tire Technology Expo exhibitors to showcase their latest developments for the tire industry and signpost expo visitors to their stands and presentations.

To raise your company's profile at Tire Technology Expo 2026 to ERJ's readers, we have put together two cost effective options - Print magazine only and Print + Website + email Newsletter.

tire
TECHNOLOGY
